Lift & ROI by Promo Mechanic

Promo Type	Avg Lift %	Notes
BOGO	30.0%	Highest unit lift. Zero trade spend recorded supplier-funded only. ROI not calculated (no cost basis).
Feature	25.0%	Second-highest lift. Significant trade investment (e.g. Energy Drink 12pk: \$50,243). Moderate ROI ~11.
Display	12.0%	Lowest lift but very high ROI (Dog Treats: 48.28, Energy Drink: 46.76) due to low trade cost.
TPR	15.0%	Mid-range lift. Highest trade spend overall (Dog Treats TPR: \$36,162). ROI ~1.24 lowest of paid mechanics.

Item × Mechanic Detail

Item	Promo Type	Avg Lift %	Trade Spend	Avg Trade ROI
Dog Treats Chewy Bites	BOGO	30.0%	\$0	—
Dog Treats Chewy Bites	Display	12.0%	\$1,460	48.28
Dog Treats Chewy Bites	Feature	25.0%	\$2,929	50.20
Dog Treats Chewy Bites	TPR	15.0%	\$36,162	1.24
Energy Drink 12pk	BOGO	30.0%	\$0	—
Energy Drink 12pk	Display	12.0%	\$6,036	46.76
Energy Drink 12pk	Feature	25.0%	\$50,243	10.95

Key Findings

Display delivers the best ROI of any paid mechanic at 46–48x return. At only \$1,460–\$6,036 in trade spend, Display is significantly underutilized relative to TPR. Reallocating even 10% of TPR budget to Display would improve total portfolio ROI.

TPR has the lowest ROI at ~1.24x despite being the single largest trade spend category. For Dog Treats, TPR consumed \$36,162 in trade spend for a 1.24x return versus Feature at \$2,929 for 50x. This imbalance should be corrected in the next JBP.

BOGO drives the highest lift at 30% with zero recorded trade cost. If BOGO events are being funded entirely by the supplier, they represent the highest-value promotional mechanism in the portfolio and should be expanded where Walmart allows.

Recommendations

1

Reallocate TPR budget toward Display and Feature.

Display ROI is 35–40x higher than TPR for the same items. Propose a trade spend reallocation in the next JBP: reduce TPR events by 20%, redirect spend to Display placement.

2

Expand BOGO events for high-velocity Beverages items.

Energy Drink 12pk and Sparkling Water 8pk have the highest velocity and would generate the most incremental units from BOGO lift. Negotiate BOGO calendar slots for Q3 and Q4.
