Supplier OTIF Scorecard

Supplier	On-Time Rate	In-Full Rate	OTIF Rate	On-Time Gap vs Goal	Assessment
Scintilla Brands	93.5%	68.8%	64.5%	+3.5%	Best overall strong on both dimensions
FreshCo	92.4%	54.3%	48.9%	+2.4%	On-time strong; in-full is the critical gap
Hydra Beauty	91.5%	68.1%	62.4%	+1.5%	Solid performer in-full second-best
PetJoy	91.3%	45.7%	41.3%	+1.3%	On-time adequate; worst in-full rate
Peak Snacks	82.8%	50.5%	43.0%	-7.2%	Only supplier below on-time goal
Total	90.3%	59.8%	54.2%	+0.3%	Chain-wide OTIF well below 98.5% target

Key Findings

OTIF of 54.2% is dramatically below Walmart's 98.5% standard. The gap is driven almost entirely by In-Full failures and On-Time rate of 90.3% is much closer to target. This means the core problem is order completeness (shortage units), not delivery timing.

PetJoy has the worst In-Full rate at 45.7%. Less than half of PetJoy POs arrive in full. Given that Dog Treats Chewy Bites already shows 90.4% in-stock at the store level, further PetJoy In-Full failures will push this into critical territory.

Peak Snacks is the only supplier below the On-Time goal at 82.8%. Combined with a 50.5% In-Full rate, Peak Snacks has the second-worst OTIF overall at 43.0%. Granola Clusters' near-flat YoY growth (+0.2%) may be partly explained by this supply disruption.

Walmart Fault Rate of 6.9% provides a defensible offset. 6.9% of late deliveries are attributable to Walmart route guide issues, DC congestion, or private fleet failures. This should be documented and presented in any OTIF dispute.

Delivery timing averages -1.0 days vs MABD arriving early. Early delivery is generally positive for in-stock but can cause DC receiving issues or advance charge-backs depending on the MABD window. Worth monitoring by supplier.

Recommendations

1

Issue formal In-Full corrective action to PetJoy and FreshCo.

Both suppliers show In-Full rates below 55%. A formal CAP (Corrective Action Plan) should be issued citing shortage units by PO, requesting root cause and 90-day improvement timeline.

2

Conduct On-Time review with Peak Snacks.

At 82.8%, Peak Snacks is the only supplier missing the On-Time threshold. A carrier and routing audit should be conducted to identify whether late departures or transit delays are the root cause.

3

Document and submit Walmart Fault credits.

6.9% of OTIF failures are attributable to Walmart. Compile carrier-level evidence and submit for fine offset through the OTIF dispute portal to reduce the \$304K exposure.
