Carrier Scorecard (Prepaid & Collect)

SCAC	Carrier	Freight Type	On-Time Rate	OTIF Rate	Assessment
CRCR	Crete Carrier Corporation	Prepaid	100.0%	47.6%	Perfect on time; In Full gap drives OTIF down
BYLR	Baylor Trucking Inc	Prepaid	94.1%	64.7%	Best overall OTIF strongest performer
WENP	Werner Enterprises Inc	Prepaid	92.6%	63.6%	Strong across both dimensions
HJBT	J.B. Hunt Transport Inc (HJBT)	Prepaid	92.3%	60.3%	Solid score, above average on both
SWFT	Swift Transportation	Prepaid	91.7%	50.0%	On time adequate; In Full needs attention
WM	WM Private Fleet Admin	Collect	91.3%	50.0%	Collect fleet on par with prepaid average
PRIJ	Prime Inc	Prepaid	90.0%	55.0%	Average performer
JBR	J.B. Hunt Transport Inc (JBR)	Prepaid	88.9%	55.6%	Slightly below on time target
CTII	Central Transport	Prepaid	87.5%	43.8%	Below on time; worst OTIF of the group
SCDS	Schneider National Carriers	Prepaid	83.8%	47.5%	Worst on time rate needs audit

Delivery Timing vs MABD

All carriers average -1.0 days vs MABD, meaning deliveries arrive approximately 1 day early on average. The Delivery Timing Split chart shows Peak Snacks and Hydra Beauty have the highest Late delivery percentages consistent with their lower OTIF scores on Page 5.

Carrier	Avg Days vs MABD	Interpretation
BYLR (Baylor)	-1.5 (earliest)	Consistently early, lowest MABD variance, most reliable
CRCR (Crete)	-1.0 to -1.5	Early but very high on time, good routing discipline
SCDS (Schneider)	Near 0 or late	Cutting it close, contributing to on-time failures
CTII (Central)	Near 0 or late	Worst MABD adherence, carrier audit warranted

Key Findings

SCDS (Schneider) and CTII (Central Transport) are the underperforming carriers. Schneider at 83.8% on-time and Central at 87.5% are both below the 90% floor. Both also show near-zero or positive Avg Days vs MABD, meaning they are not arriving early to buffer for variability.

CRCR (Crete Carrier) achieves 100% on-time but only 47.6% OTIF. This confirms that In-Full failures are a supplier-side problem, not a carrier problem. When product is available and loaded correctly, Crete delivers it on time every time.

WM Private Fleet (Collect) performs on par with prepaid carriers at 91.3% on time / 50.0% OTIF. This is important for OTIF dispute filing: Walmart-controlled freight underperforming on OTIF constitutes Walmart fault, supporting dispute credit claims.

Freight type (Collect vs Prepaid) does not explain the OTIF gap. Both modes operate at similar on time rates (~91%). The OTIF problem is driven by In Full rate, which is entirely a supplier and product availability issue, not a transportation mode issue.

Recommendations

- 1 Put Schneider National (SCDS) on a 90-day performance improvement plan.**
At 83.8% on time, SCDS is the lowest-performing prepaid carrier. Issue a formal notice citing on time rate and average MABD variance. Evaluate carrier substitution if 90-day target of 90%+ is not met.
- 2 Use WM Private Fleet underperformance to support OTIF dispute credits.**
WM Private Fleet (Collect) OTIF of 50.0% demonstrates that Walmart-controlled freight contributes to OTIF failures. Document PO lines shipped on Collect where delivery was late to build the dispute file.
- 3 Consolidate volume onto BYLR and WENP for high value lanes.**
Baylor (64.7% OTIF) and Werner (63.6% OTIF) are the strongest prepaid performers. Where lane choice is supplier-controlled, routing guide updates should favor these carriers for high-volume SKUs.
